								easy with the use of 3D Printing process at Zener Technologies. With 3D printing, the transition time from idea and design to a functional prototype was shortened to 3 days. The demand for first phase of PPE distribution was fulfilled by outsourcing production - Ten 3D printing hubs joined to make around 150 face shields per day. 3D printers used were Tier time UP BOX+ and UP300, Creality Ender and CR10 mini, Qidi and Prusa 3D printers, and the materials used were PLA, ABS and PETG 3D filaments. Each frame took around 1 hr 15mins of print time and consumed 40gram material. These 3D printed	ame": "S AVE _20 200 428 _11 111 2.jp g", "f ileP ath" : "/u ploa ds/c usto mer /99/ Feat ureP roje ct/p roje ctU ploa ds/S AVE _20 200 428 _11 111 216 356 165 614 21.jp g", {" fileN ame": "S AVE _20 200 428 _11 110 0.jp g", "f ileP ath" : "/u ploa ds/c usto mer /99/ Feat ureP roje ct/p roje ctU ploa ds/S AVE _20
